RE: 4815 CLAYTON ST

Dear Owner,

As part of the VB/I-70 Superfund Site investigation, we recently took soil samples at your property to find out if there is too much lead or arsenic in your yard. The results show that your property does not require a cleanup. The levels of both lead and arsenic are below our cleanup levels. The soil sampling results for your property are as follows:

**ADDRESS: 4815 CLAYTON ST** 

**EPA Cleanup Levels** 

Lead

101 parts per million (ppm)

above 400 ppm

Arsenic

4 ppm

above 70 ppm

This means that your property is not considered by EPA to be part of the VB/I-70 Superfund Site. EPA does not believe that further measures are necessary. You and your family are not at significant risk from arsenic through ordinary contact with soil in your yard while playing, working, gardening, etc. Please note that there may be small areas in your yard, particularly near your house, that may have higher levels of lead due to peeling, external lead-based paint. EPA encourages all owners of older properties to take reasonable precautions regarding lead-based paint.

For further information, please feel free to contact EPA Community Involvement Coordinators Jennifer Chergo at (303) 312-6601 or Patricia Courtney at (303) 312-6631.

Sincerely.

Victor Ketellapper

Remedial Project Manager

The Environmental Protection Agency, Region 8
